

CONQUEST

INSTRUCTIONS FOR USE:

- 1). Neutralize chlorine - chlorine levels should be less than 1ppm.
- 2). Add Poly-Tech 60 (polymer-based algaecide) - extra protection for the pool while Conquest is working and chlorine levels are low.
- 3). Backwash filter.
- 4). Add Conquest (50% more product is generally needed for concrete pools) - run system continuously for 24-48 hours.
- 5). Backwash the filter - disassembling and cleaning out the filter is preferred.
- 6). Raise chlorine level back to desired level.
